

## Online

**Online is a data cleansing service, providing organisations with a cost effective and user-friendly way of improving the integrity of their data with 24/7 access to a wide range of industry data files.**

Designed for data savvy users, our online tool enables users to upload data files and select products and services from a range of options 24/7. Automated reports are emailed to users and a choice of suppressed or flagged output files are available to download. Online provides a quick option for cleansing data in varying formats and specifications, ideal for cleansing or auditing ad-hoc files.
